DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on December 19, 2005 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

The specification does not appear to clearly describe the regulator(s) since the specification does not use the term regulator. Examiner notes the claim language should correspond with language used in the specification for clarification purposes.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the phrase "in particular" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claims 1-3 utilize the term "regulator". It is unclear what applicant means by this term since it is not clearly defined in the specification. It is unclear if the regulator is an inhibitor, as implied by claim 1. Please clarify.

Claims 1 and 3 recite the limitation "**the** synthesis of **the** extracellular matrix". There is insufficient antecedent basis for these limitations in the claims.

Claims not specifically addressed are indefinite due to their dependency.

Claims 1 and 2 provide for the use of regulators, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 1 and 2 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Krumdieck et al. (US 5,650,389).

With respect to claims 1 and 2, Krumdieck et al. discloses the use of regulators (decorin), in particular of inhibitors of the synthesis of the extracellular matrix, of cell proliferation and migration, of inflammation, in order to develop a pharmacologically active coating on a biological platform, in particular a prosthesis (col. 2, lines 20-25; col. 4, lines 6-25; claims 14, 15, 17).

With respect to claims 3-5, Krumdieck et al. discloses platforms or prostheses, characterized in that the platforms or prostheses comprise a coating containing a therapeutically effective quantity of a regulator (decorin) of the synthesis of the extracellular matrix, wherein the platforms or prostheses are implantable devices (col. 2, lines 20-25; col. 4, lines 6-25; claims 14, 15, 17).
